JOHN KEHEW,

Importer and Manufacturer,

No. 49 NORTH WATER ST.,

NEW BEDFORD,

Has constantly on hand a large assortment of every description of

NAUTICAL INSTRUMENTS

Warranted Sextants, Quadrants, Spy Glasses, and Barometers from the most celebrated English and American Manufacturers; Amroid Barometers, French Telescopes, Masthead Glasses; Transparent, Binnacle, Storm, Cabin, and Boat Compasses; Log Glasses, &c. &c., with

CHARTS

of all parts of the world visited by Whalemen, (as good an assortment for Whalemen as can be found in this country,) and every description of

NAUTICAL STATIONERY.

Mr. Kehew will give his personal superintendence to the repairs of all kinds of Navigation Instruments, and all work done in his shop will be warranted.

Every Instrument sold by J. K. will be carefully adjusted before delivery, and warranted to the purchaser if required.

☞ Experimental information given, when desired, in the adjustment of the Sextant.

In advising my friends and the public generally of my removal to the new premises erected on the corner of North Water and William Sts., (No. 49 North Water St.) I would avail myself of the opportunity to acknowledge gratefully the very liberal support I have been favored with for the past eighteen years.

The new premises have been built and fitted up expressly for the Navigation Business, with a view of conducting the same with greater energy, facility and systematic correctness. The size and general arrangement of the store will enable me to keep a larger stock and more complete variety of Instruments, Charts, and Stationery than has hitherto been kept by me; while my knowledge of the details of the business (being a practical workman) and being acquainted with the best manufacturers, insures me a constant supply of the most desirable articles in the line, that may be needed by SHIP OWNERS, MASTERS or OFFICERS.

My Compasses are manufactured under my personal supervision, on the premises, and my facilities for conducting this important branch of the business in the best and most expeditious manner are now very complete.

My workmen in the Repairing Department are men who learned their trade of me, and in whom there can be implicit confidence placed. All the variety of Nautical Instruments for sale will be repaired with accuracy and promptly. My prices will be found low and uniform.

From long experience in the requirements of the business, and my personal attention to the prompt execution of all orders, I feel great confidence in being prepared satisfactorily to execute all favors with which I may be entrusted, and which are respectfully solicited.

JOHN KEHEW.
